Diamond Therapy · Professional Application Guide

In-salon finishing treatment · For licensed professionals

20 mL ampoule | 12 ampoules per box | Up to 4 applications / ampoule (5 mL) | About 36–48 / box (estimate)

What you need: ampoule · syringe (drawing only) · mixing bowl · application brush · comb · clips · plastic cap · blow dryer · flat iron

STEP 1

Warm the closed ampoule

- If the contents look solid, warm the closed ampoule in warm water until clear.

STEP 2

Cleanse & towel-dry

- Clarifying shampoo; rinse well with warm water.
- Towel-dry.

STEP 3

Draw with the syringe

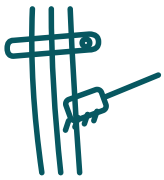

- Draw only the amount for your mix (see chart).
- Close tightly. Syringe for drawing only, never injection.

STEP 4

Mix to a mousse

- Combine with warm water at your goal's ratio.
- Mix to a smooth, even mousse.

STEP 5

Apply section by section

- Start ~1/8 in from roots to ends; off the scalp.
- Saturate, comb, massage ends; plastic cap.

STEP 6

Process

- Process 10–15 minutes. Heat is optional.
- Let cool 1–2 minutes.

STEP 7

Rinse

- Rinse briefly with lukewarm water to remove excess.

STEP 8

Blow-dry & flat iron

- Apply heat protection, then blow-dry fully.
- Flat iron in sections at chart temp.

Choose your mix

Goal	Product + warm water	Per ampoule	Flat iron
Volume / Strength Boost	5 + 35 mL	up to 4	Fine 350°F · Med–thick 350–410°F
Color Boost	5 + 25 mL	up to 4	All 350°F
Intensive	10 + 20 mL	up to 2	Fine 350°F · Med–thick 350–410°F

Long or dense hair may need more mix, so plan on 3 per ampoule.

Pro tips

- Draw only what you need; close the ampoule tightly.
- With keratin? WhatsApp our product team first.
- Extensions: check with the specialist; lengths & ends only.
